

EMPOWERING OUR CHILDREN

The Power Generation Company of Trinidad and Tobago Limited is proud to have given 73 Nano-Sim Technology capable tablets to the Ministry of Education's Adopt-A-School Programme.

Together with the partnership of our employees we were able to raise over \$100,000 and donate to 28 primary and secondary schools across Trinidad and Tobago.

We have always believed in investing in young people and we look forward to the impact this will one day have on our nation's future.
